# triflex® R triflex® twisterchain® twisterband

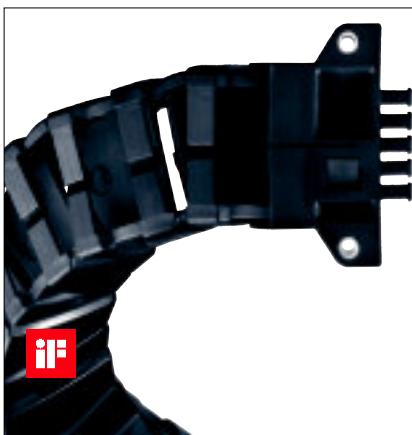

Robotic-, 3D- and  
circular movements

### triflex® R - 3D-robotic e-chains®

- The first choice for multiaxis-robots
- **Variant TRC** - closed design with smooth and robust exterior
- **Variant TRE** - "easy" design, easy to fill from outside
- **Variant TRL** - light weight, cost-efficient and very easy to fill, for non robotic applications
- Torsion ca.  $\pm 10^\circ$  per link possible
- High torsional stability (TRC/TRE)
- Easy shortening and lengthening
- Small bending radius, small pitch

► from page 2.4

### easy triflex® - easy filling

- Easy filling from two sides and complex movements
- For reparations or supplements of existing triflex®-Systems
- For simple robotic- and 3D-applications
- Fast cable assembly with "easy" design
- Where rectangular shapes fit better
- Combination of different bending radii and movement directions possible
- Shortening and lengthening anywhere
- 3D e-chain® for non robotic applications

► from page 2.30

### triflex® - enclosed version

- 3-axis motions in machinery of all kinds (combined circle- and stroke-movements)
- Completely enclosed - protection against dirt and chips
- For simple 3D-applications
- High tensile strength
- Where rectangular shapes fit better
- Modular, robust
- Combinations of varying bending radii and moving axes possible
- 3D e-chain® for non robotic applications
- Connecting, separating possible at every link

► from page 2.42

# twisterchain® new | twisterchain® classic | twisterband

For circular movements and rotary motions in a small spaces

**NEW** in this catalog

## twisterchain® new - new generation circular e-chains®

We recommend for new constructions!

- Sturdier through intermediate link - heavier loads possible
- Rotary/Spiral movements up to 540°
- Highly dynamic and smoother running (with a new guide trough)
- Modular, variable width, height and radius
- Cable-friendly, smooth interior
- Crossbars snap-open along inner radius
- Rotary speeds up to 2 m/s and more

► from page 2.56

## twisterchain® classic - first generation

- For new constructions we recommend:  
TC32, TC42, TC56 ► from page 2.56
- Fast cable change
- Modular design - variable widths
- Crossbars can be opened on both sides
- For circular motions up to 540° (with special attachments)
- Variable interior separation
- Electrically conductive steel mounting brackets

► from page 2.82

**NEW** in this catalog

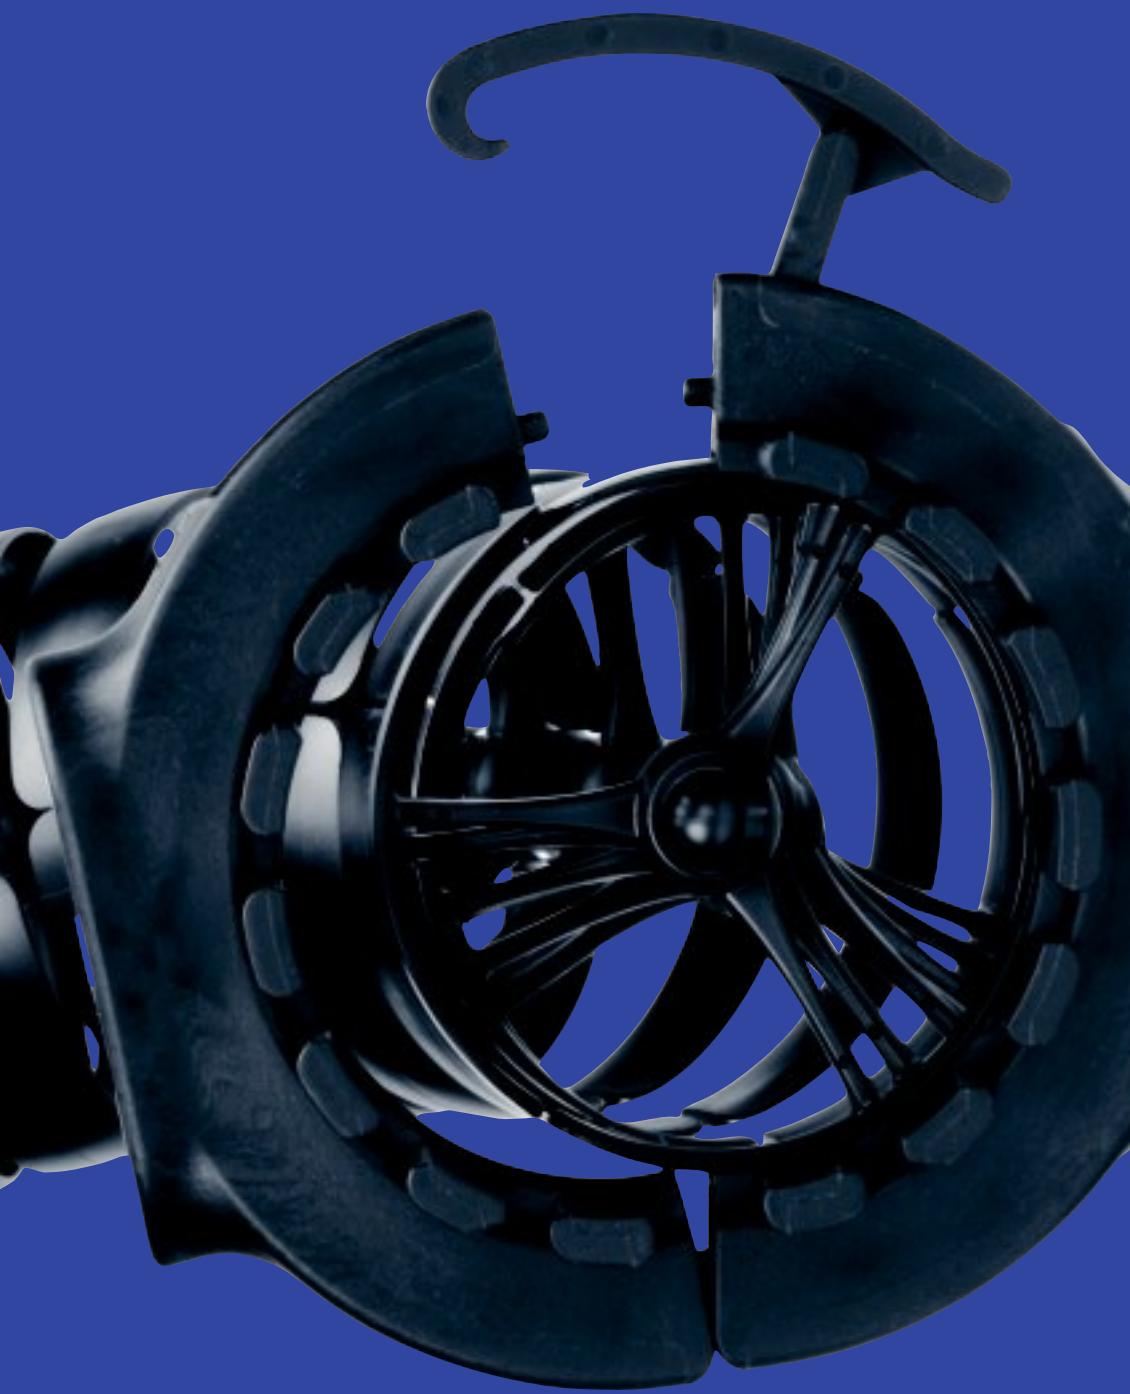

## twisterband - rotary motions

- Rotary motions in a small spaces
- 4 sizes available
- Rotary movements up to 7000° (installation position, vertical: up to 3.000°, horizontal 7.000° and more possible)
- Rotary speeds up to 360°/s possible
- Compact, modular and lightweight
- Ribbons can be shortened easily
- Minimum installation space
- Can be used in various installation positions
- Cost-effective

► from page 2.104

3D-robotic e-chains<sup>®</sup>  
**triflex® R**

# triflex® R - 3-dimensional e-chains® for robots

triflex® R (R for "round") is the third generation of multi-axis e-chains®. Design features include:

- Optional fibre rod for spring loading of the triflex® R
- Approximately  $\pm 10^\circ$  twist per e-chain® link
- High tensile strength of the ball-and-socket joint
- Easy assembly and modification due to single moulded link design. No support elements (steel cables, spring suspensions etc.) are necessary

The triflex® R product family now comprises more than 100 components meeting all requirements ranging from those of small palletising robots to large welding robots.

## Typical industries and applications

- Robotics/Automation
- Machine tools
- Handling machines - 6-axis
- Packaging machines
- General mechanical engineering, etc.

Video on the web ►

IF-Design awards for  
TRC and TRL-design

Series TRC - Electrically conductive  
ESD/ATEX version upon request

Cleanroom suitability  
upon request

UL94-V2  
classification

**triflex® RS - universal module for safe realisation of complex robotic movements**  
triflex® RS attaches to the existing fixation point on the robot. Thanks to its low installation height, triflex® R runs parallel and tightly against the robotic arm. Even applications with heavy space restrictions can be realized.

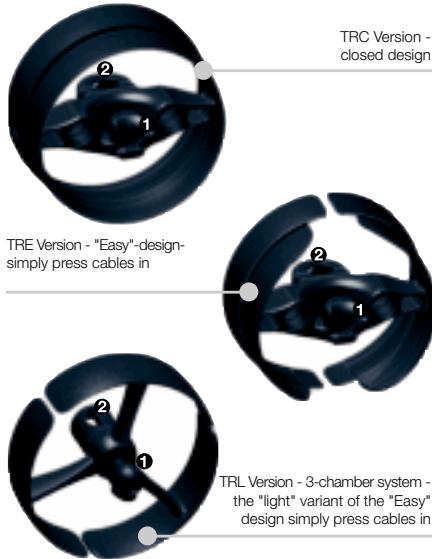

Video on the web ►  
[www.igus.de/RS\\_Film](http://www.igus.de/RS_Film)

Fiber rod module for directed pretension and universal assembly kit for multifaceted adjustments

triflex® R Set - Routed closely on the robotic arm for extreme flatness

### Select this system for:

- The first choice for multi-axis-robots
- **Three variants are available:** TRC: Closed design, TRE: "Easy"-design, easy to fill from outside, TRL: The "light" variant of the "Easy"-design
- Universal for general machinery
- Multi-axis (3D) movement
- High torsional stability
- Easy shortening and lengthening
- Smooth interior and exterior edges (TRC)
- Small bend radius
- ① Ball-and-② socket principle
- Cables easy to assemble and to replace (TRE/TRL-version)
- triflex® R-Set - compact module for all movements on robots, which can be fixed on existing fastening points
- TRL - one piece, thus very lightweight
- High tensile strengths without additional elements like steel cable and spring elements etc
- You can find more technical data about the material, chemical resistance, temperatures ► **chapter design, from page 1.38**

\* For quick and easy insertion / removal of cables using the easy chain® principle, we recommend a maximum cable diameter of 70% of the specified value.

\*\* TRE.125/TRC.125 - max. cable diameter Ø 41 mm. Max. cable diameter changes to

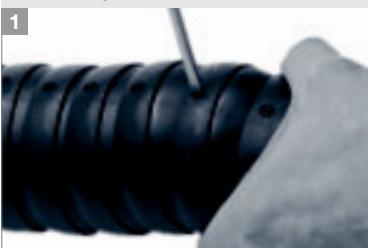

Ø 36 mm only, if shortening/lengthening of a filled triflex® R is required

**Assembly | TRC.30 · TRC.40 · TRC.60 · TRC.70 · TRC.85 · TRC.100**

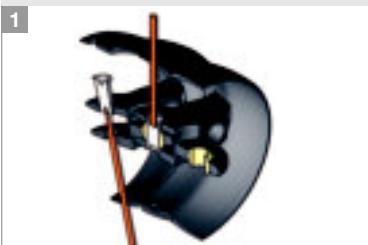

Hold two pieces together at inner radius and move socket up against the ball's wedged end

**Separating | TRC.30 · TRC.40 · TRC.60**

Bend triflex® R into its radius and twist apart, counter-clockwise

**Separating | TRC.70 · TRC.85 · TRC.100**

Insert screw driver into the opening of the socket from the top. Then twist apart, counter-clockwise

**Assembly | Separating | TRC.125 (C-Version)**

Connector principle = Ball head clevis joint (similar to the proven trailer hitch design)

Improved assembly/disassembly for large sizes. Faster assembly with less effort

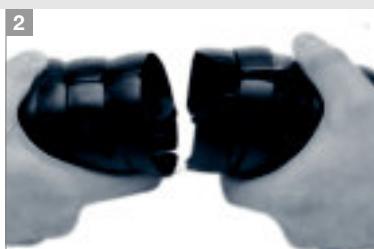

See an assembly demo at ► [www.igus.de/en/triflexR\\_assembly](http://www.igus.de/en/triflexR_assembly)

**Assembly | TRE.30 · TRE.40 · TRE.60 · TRE.70 · TRE.85 · TRE.100**

Hold two pieces together at inner radius and move socket up against the ball's wedged end.

Push until a clicking sound indicates a secure fit of ball into socket (e-chain® section exposed for the purpose of demonstration)

**Separating | TRE.30 · TRE.40 · TRE.60**

Bend triflex® R into its radius and twist apart, counter-clockwise

**Separating | TRE.70 · TRE.85 · TRE.100**

Insert screw driver into the opening of the socket from the top.

Then twist apart, counter-clockwise

**Filling | TRE.30 · TRE.40 · TRE.60 · TRE.70 · TRE.85 · TRE.100**

Easy to fill - simply press cables in...

...and easy to take the cables out

**Assembly** | TRL.30 · TRL.40 · TRL.60 · TRL.70 · TRL.100

igus® triflex® R TRL - very easy to assemble -  
simply press the ball into the socket, ready!

**Separating** | TRL.30 · TRL.40 · TRL.60 · TRL.70 · TRL.100

Just twist the ball slightly to remove it from its socket

**Filling** | TRL.40 · TRL.30 · TRL.60 · TRL.70 · TRL.100

Easy to fill - simply press cables in...

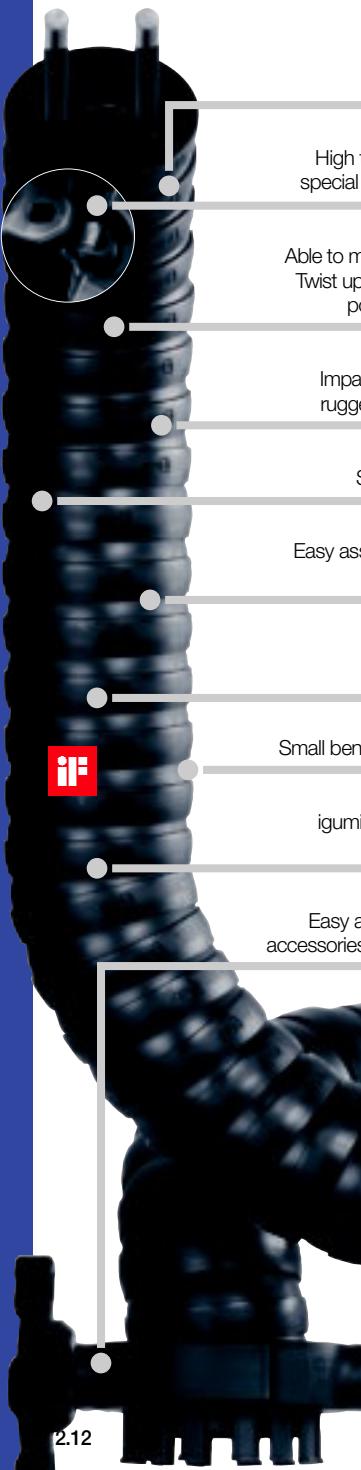

...and easy to take the cables out

**Installation** | Mounting bracket in this case, a "light" bracket with an intermediate connection

Easy assembly - to open, push a screwdriver against one side and prise apart

See an assembly demo at ► [www.igus.de/en/triflexR\\_assembly](http://www.igus.de/en/triflexR_assembly)

TRC - closed,  
chip-resistant design

High tensile strength thanks to  
special ball-and-socket principle

Able to move multi-dimensionally -  
Twist up to approx.  $\pm 10^\circ$  per link  
possible in longitudinal axis

Impact-resistant, dirt-repelling,  
rugged and abrasion-resistant

Smooth, rounded exterior

Easy assembly and dismantling -  
one die-cast component

High stability - thanks  
to exterior stop dogs

Small bending radii and short pitch

igumid NB:  $-40^\circ$  up to  $+80^\circ$  C  
VDE 0304 IIC UL94 V2

Easy attachment and intelligent  
accessories onto the robot/machine

## Robotic applications, closed, chip-resistant

### When to use Series TRC:

- If a secure, closed and chip-resistant energy supply is required for multi-dimensional (3D) movements
- If high torsional stability is required
- If the system has to be shortened or lengthened easily
- If small bending radii are required
- If high tensile strength is important
- If a smooth and robust exterior against interfering edges is required

### When to use a different igus® Series:

- For circular movements with high loads
- **System twisterchain® new, from page 2.56**
- When a rugged, easy to fill variant is needed
- **triflex® R - TRE, page 2.14**
- If a more simple and low-cost 3D-solution is required
- **triflex® R - TRL, page 2.16**

triflex® R-Set - compact module for  
all movements on robots available

Available from stock. Delivery in 24h or today!\*

\*Delivery time means time until shipping of goods

\*Available upon request. Delivery time approx. 6-8 weeks after order

<sup>2)</sup> Max. cable diameter Ø 41 mm. Max. cable diameter changes to Ø 36 mm only, if shortening/lengthening of a filled triflex® R is required

## Optional | C-version - quick assembly, 50% higher forces

NEW in this catalog

Now available with proven bolt connection for even faster assembly and disassembly

- Linear pull force capacity increased up to 4.000 N
- Up to 4 times stronger and improved bending radius strength
- C-version drastically reduces installation time
- Stronger lock for torsion limitation
- igubal® Spherical Bearing for non-slip traction

### Option: Swivel bearing - smooth motion

- To smoothen the motion of the cables requiring guidance, it is necessary to allow for extreme twisting and bending. This relieves cables with highly sensitive bending radii (such as fiber optic cables) when following a robot's movements. Swivel bearings are used to achieve this
- Available in 2 designs (with or without strain relief)
- Pivoted bearing with a maintenance-free igubal® ball-and-socket joint
- Minimization of critical bending cycles
- Gentler motion

triflex® RS - Extremely flat design,  
guides close to the robotic arm

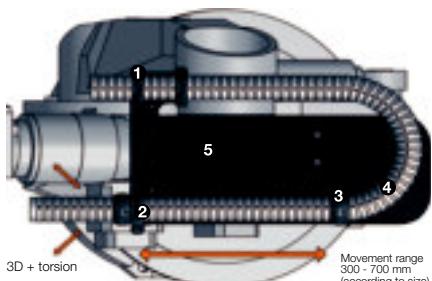

Integrated recuperating spring  
prevents loop formations

### Universal module for any robotic motion

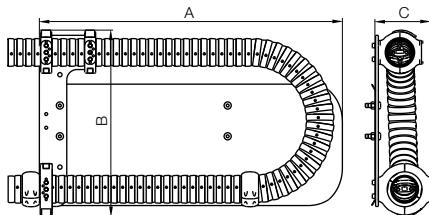

triflex® RS is a very compact universal module that can be attached to the fastening points on the robot. Applications in very limited space can be realized, thanks to the small installation height and to the fact that triflex® RS can be installed parallel to the robotic arm. triflex® RS with integrated spring mechanism allows efficient energy supply to the robotic head, without stress on the cables. The triflex® R kit offers all advantages of proven triflex® accessories, such as the FlexBar, universal assembly kit and fiber rod module in one system. All triflex® R features are also included in the universal triflex® RS module.

- **Standard-package** for all applications for immediate installation
- Integrated spring mechanism
- The first choice for robotic applications with limited space
- Saves space - small installation height and closely routed on the robotic arm
- Outstanding service life
- Universal installation

- ① Mounting brackets for safe fastening
- ② Glide lead-through for a close and parallel guidance on the robotic arm
- ③ Limit stop dog for a defined free movement
- ④ Integrated recuperating spring prevents loop formations
- ⑤ Single module, space-saving and quickly mounted on robot

**Determining the cable area**

Mounting bracket TR.70.01 - Strain relief for electric cables

We would be glad to help you in the selection of the right size with our triflex® R project planning software

Examples of filling TRC.70 and TRC.40

**Choice of the right e-chain® length**

Filling and correct sizing - Clearance for cables and hoses is important when filling triflex® R, in order to compensate for friction forces due to relative movement between e-chain® and filling. The following serves as a rule of thumb: The total of all cable/hose diameters must not exceed 60% of the available cross section. A clearance of min. 10% (min. 1 mm) needs to be maintained towards the next cable and the triflex® R. Please see the attached chart for available cross sections. igus® will be glad to run such calculations for you.

For Series	Effective areas [mm <sup>2</sup> ]	For Series	Effective areas [mm <sup>2</sup> ]
TRC/TRE		TRL	
TRC/TRE.30	313	TRL.30	313
TRC/TRE.40	508	TRL.40	670
TRC/TRE.60	1144	TRL.60	1499
TRC/TRE.70	1788	TRL.70	2342
TRC/TRE.85	2431	-	-
TRC/TRE.100	3176	TRL.100	4125
TRC/TRE.125	4584	-	-

**Example of determining cable area**

$$A_{\text{Leitung}} = \frac{d^2 \times \pi}{4}$$

**Examples :**

$$A_1 = (10 \text{ mm} \times 10 \text{ mm} \times \pi) / 4$$

$$= 78,5 \text{ mm}^2 \times 7 \text{ (number of cables)}$$

$$= 549,50 \text{ mm}^2$$

$$A_2 = (18 \text{ mm} \times 18 \text{ mm} \times \pi) / 4$$

$$= 254,34 \text{ mm}^2$$

$$A_3 = (22 \text{ mm} \times 22 \text{ mm} \times \pi) / 4$$

$$= 379,94 \text{ mm}^2$$

$$A_{\text{Leitung}} = A_1 + A_2 + A_3 = 1183,7 \text{ mm}^2$$

The smaller the ratio between the effective area and the sum of the cable areas, the lower the load on the cables

## Customer-specific special cable for robotic and torsion applications

- Control, motor, servo, bus and data cables
- Shielded and unshielded
- Outer jacket material: PVC, PUR, TPE
- Special cables from 500 m
- Torsion area according to requirement
- Sectors: Robot and 3D applications

The service life of cables in torsion applications depend disproportionately on the exact progression of the angle of torsion and the cable length of the exact application. As a single test facility is often insufficient, chainflex® cables are tested on various constructional systems. Your torsion cables are tested as realistic as possible for your application. For this purpose, igus® uses up to 8 different test facilities in the in-house laboratory.

### chainflex® robotic cables CF ROBOT - Twistable cables for robots available from stock

The proven CFROBOT cable family that is available from stock is now UL and CSA certified. All deliveries from 05/2011 are manufactured with the approvals.

- From 1 m, no minimum requirements
- ±180° on 1 m
- 3.000.000 cycles tested

More information ► [www.igus.eu/chainflexnews](http://www.igus.eu/chainflexnews)

#### NEW in this catalog

### CF77.ULD - chainflex® PUR control cable, ± 180° twistable

For twistable load requirements

### triflex® R - readychain® cable packages for robots

High component holding times and low downtimes are of the highest priority in manufacturing plants. With a triflex® R readychain® we design and develop a customized readychain® system for you, consisting of the "construction kits" triflex® R, chainflex® and igus® connectors. An installation can of course be executed by our triflex® R installation engineers on your site.

#### Your advantages:

- Reduces your storage costs to zero for cables, e-chain® and connectors
- Cuts your running time by half
- Responds flexibly to order variations
- Minimize machine downtimes
- Reduce the number of suppliers and orders by 75%

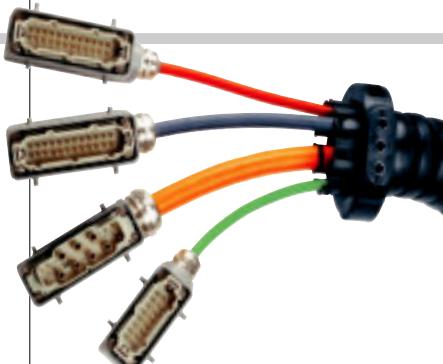

### triflex® R - Tests in the igus® lab

Testing facility at the igus® laboratory

Torsion test of CF-ROBOT

Ready-made packages in 3 to 10 days

On-location assembly by the igus® specialist team

## We maximize your robot application's service life

Robot applications are very diverse and sometimes extremely complex in terms of configuration. To maximize your robot application's service life with triflex® R, igus® has a specially trained, robotics planning and installation team which can install triflex® R e-chains® into your applications. Minimize your planning effort by delegating as many tasks as possible to us. Our trained staff offer support toward smooth project implementation every step of the way - whether you simply want to consult our assembly team or have an entire system of machines planned and installed. By telephone we can always provide answers to a host of questions and point out all the advantages of triflex® R for your company. On site, we can acquire all the data necessary for preparing detailed planning documents. From project planning through customized quotations right up to expert installation of the triflex® R on your site, we remain at your service round the clock.

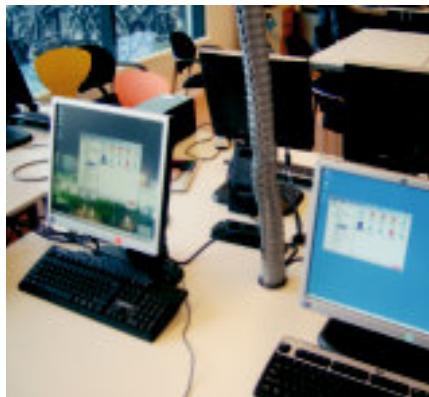

igus® system warranty - igus® warranty certificates will be issued for your application individually. "chain, cable, warranty"

- We also offer guarantee certificates for complete systems
- No minimum order quantities, no surcharges
- 1500 staff in Germany and at 26 international subsidiaries and offices. Stations in over 30 other countries

## Your advantage

- We are wherever you need us
- Your service requirements are fulfilled quickly by experts on location
- Guaranteed, fast worldwide delivery
- Spare parts are available from stock at short notice
- Order tracking via igus® "i-net" - [www.igus.de/en/i-net](http://www.igus.de/en/i-net)

iF-award-winning triflex® R TRE for a safe energy supply also in office equipment

Cable management in a TV studio with triflex® R

igus® System E6 and triflex® R TRE in a Y/Z-gantry

Torsion testing of triflex® R in the igus® laboratory, Cologne

igus® E2 e-tube and triflex® R in a processing machine

Optimal cable guidance even under extreme conditions, such as here in the Jungmeier roof tile plant

for 3D-applications

**easy triflex®**

# easy triflex® - e-chain® for 3D-applications

The triflex® Series was developed to realize safe energy supply in the case of multi-dimensional movements. In doing so the flexibility of a hose was combined with the stability of an e-chain® and its defined radii. With the easy triflex® the installation of cables, wires and hoses has also become child's play. In case of flexible crossbars the cables are now simply pushed into the e-chain® from above or below. The unique modular program allows you to follow very complex movements. For Example: Combine 1-axis, 2-axis and 3-axis movement links in one e-chain®.

## Typical industries and applications

- Machine tools
- Robots
- Handling equipment
- Material handling
- Plastics machinery
- Construction machines
- Vehicles
- Machinery of all kinds
- Medical equipment
- Semicon office furniture

iF-Design awards for  
easy triflex®-design

# triflex®

Closed, 3D-applications

# triflex® - enclosed, 3D applications

triflex® - e-chain® for 3D-motion. The triflex® Series was developed to realize safe energy supply in the case of multi-dimensional movements. In doing so the flexibility of a hose was combined with the stability of an e-chain® and its defined radii. The unique modular program allows you to follow very complex movements. For example: Combine 1-axis, 2-axis and 3-axis movement links in one e-chain®.

## Typical industries and applications

- Machine tools
- Robots
- Handling equipment
- Material handling
- Plastics machinery
- Construction machines
- Vehicles
- Machinery of all kinds
- Medical equipment

iF-Design awards  
for triflex® design

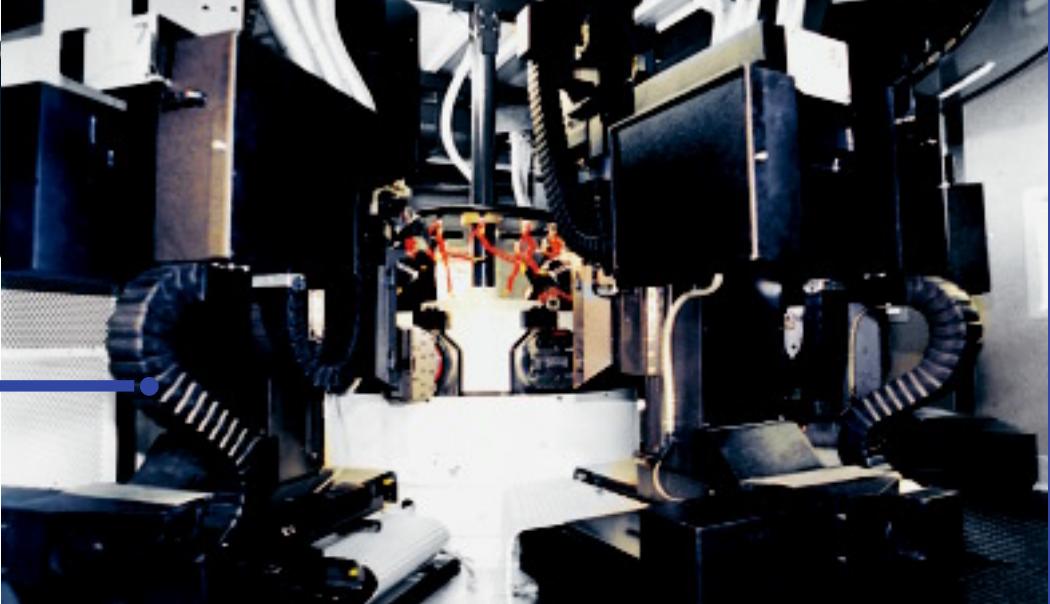

Torsional motion  
possible

UL94-V2  
classifications

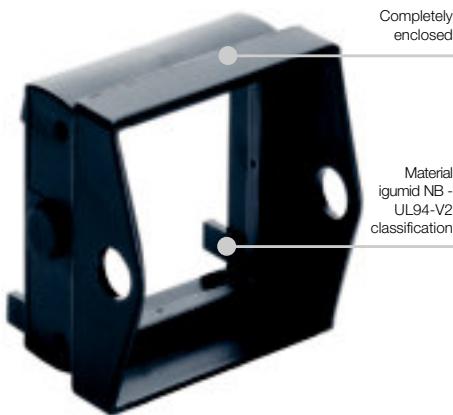

Various triflex® e-tubes on the inside of a machining center

triflex® for 3 movement directions combined  
with triflex® for 1 movement direction

triflex® 332 as unsupported link  
from machines to control desk

**Select this modular, robust, e-chainsystem® for:**

- 3-axis motions in machinery of all kinds
- Dirty environments
- High tensile strength
- Where rectangular shapes fit better
- Side-mounted unsupported
- Completely enclosed - protection against dirt and chips
- Combinations of varying bending radii and moving axes
- Connecting and separating possible at every link
- Flanged mounting brackets or mounting brackets angle, galvanized steel
- Series 352 and 353 snap-open, 50 mm cross-section
- Combination Series 353/333 possible
- Cost-effective design for complex movements
- You can find more technical data about the material, chemical resistance, temperatures ► chapter design, from page 1.38

**Selection table**

Series	Inner height/Inner width □ Bi [mm]	Outer width/Outer height □ Ba [mm]	Bending radii R [mm]	Page
<b>Single-axis and double-axis movement:</b>				
332.16	16	26	038 - 100	2.48
332.32	32	50	075 - 250	2.48

**Assembling | triflex®**

Twist and snap in

Snap in pin "push-button-principle"

**Separating | triflex®**

Release side link

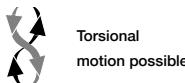

Twist and separate

**Filling | triflex® - Serien 352 und 353**

To open Series 352 and Series 353 only - Insert screwdriver into slot on top of lid and push down

See an assembly demo at ► [www.igus.de/en/video](http://www.igus.de/en/video)

## Price index

Torsional motion possible

iF-Design awards for triflex® design

Release side link, twist and separate

To open Series 352 and Series 353 only - Insert screwdriver into slot on top of lid and push down

## When to use the Series 332/333/352/353:

- For applications that move within two or three axes (combined rotary and circular movements)
- If chip protection is required

## When not to use them:

- For complex robotic applications
  - triflex®R - TRC, from page 2.12
- For gliding applications, use other e-chains®/Tubes of similar dimensions
  - System E4, chapter 7
- For rotary movements
  - System twisterchain®, from page 2.56

- ① KMA, flanged and angled mounting brackets available
- ② Combinations of varying bending radii and moving axes
- ③ Completely enclosed
- ④ Protection against dirt and chips
- ⑤ Combination of Series 353 and Series 333 possible
- ⑥ Series 352 and 353 snap-open, 50mm cross-section
- ⑦ Cost-effective design for complex movements
- ⑧ Assembling and separating at any given point
- ⑨ High tensile strength

--------------	----	----	-------------------------	--------

Supplement Part No. with required radius (R). Example: 333.50. [100].0

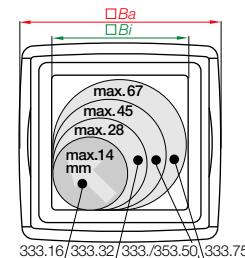

0 = standard color, other colors ► page 1.39

\*RBR = Reversal Bending Radius

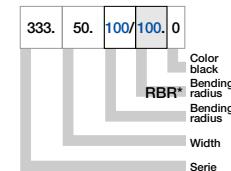

The bending radii are doubled in the case of the Series 333!

Part No.	Pitch [mm]
333.16	13,3
333.32	25
333.50	30
333.75	36
353.50	30

## Part No. structure

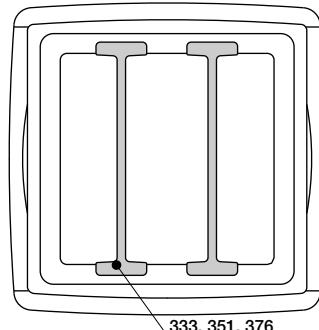

**Vertical Separators**

Modular separators are available as interior separation for the igus® triflex® System. They can be used for both vertical and horizontal sub-division. If the separators are assembled every other link and turned 90°, the e-tube can be sub-divided into four segments. We recommend ordering the e-tube preassembled, as subsequent assembly of separators is only possible after dismantling the e-tube. Please note that assembled separators have a different part number than unassembled separators.

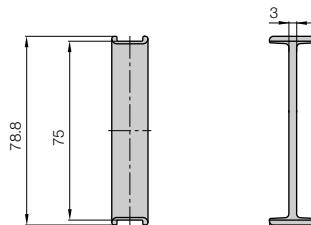

Horizontal subdividing

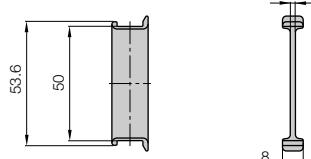

Vertical subdividing

**332.75/333.75****Vertical Separator**

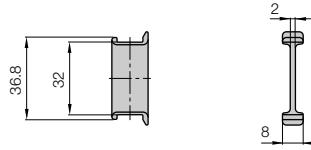

unassembled	375
assembled	376

**332.50/333.50/352.50/353.50****Vertical Separator**

unassembled	350
assembled	351

**332.32/333.32****Vertical Separator**

unassembled	332
assembled	333

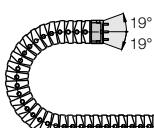

**Option KMA\* - The Standard**

- Bolted connection outside of e-chain® cross-section possible
- Split-on KMA mounting bracket
- Corrosion-resistant
- Available with or without strain relief tiewrap plates
- Universal mountable with attachment capability on all sides

\*KMA = Polymer Metal Mounting Bracket
